

# Add Two Numbers

## Ex-1 Add two Numbers

```
const num1 = 8;  
const num2 = 2;  
const total = num1 + num2;  
console.log(`The total of ${num1} and ${num2} is: ${total}`);  
//The total of 8 and 2 is: 10
```

## Ex-2 Add two numbers Entered by the User

```
const Num1 = parseInt(prompt('Enter User Input: '));  
const Num2 = parseInt(prompt('Enter User Input: '));  
const Total = Num1 + Num2;  
  
console.log(`The total of ${Num1} and ${Num2} is: ${Total}`);  
//Output : The total of Num1 and Num2 is: Total
```
